DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed over prior art of record. The following is an examiner's statement of reasons for allowance: Narayan (US 5717827) discloses a text-to-speech system includes a memory storing a set of quantization vectors. A first processing module is responsive to the sound segment codes generated in response to text in the sequence to identify strings of noise compensated quantization vectors for respective sound segment codes in the sequence. A decoder generates a speech data sequence in response to the strings of quantization vectors. An audio transducer is coupled to the processing modules, and generates sound in response to the speech data sequence. The quantization vectors represent a quantization of a sound segment data having a pre-emphasis to de-correlate the sound samples used for quantization and the quantization noise. In decompressing the sound segment data, an inverse linear prediction filter is applied to the identified strings of quantization vectors to reverse the pre-emphasis. Also, the quantization vectors represent quantization of results of pitch filtering of sound segment data. Thus, an inverse pitch filter is applied to the identified strings of quantization vectors in the module of generating the speech data sequence. Narayan fails to specifically disclose a client/server system in that input text received at the client device is processed and analyzed to determine diphones. Upon determination of diphones, send request to server to retrieve diphone wavephone, then compress selected diphone residuals and LPC. Transmitting compressed diphone residuals and LPC to the client device. Furthermore, it would have not been obvious to

one of ordinary skill in the art at the time of invention to modify Narayan to obtain to claim invention. Therefore, claims 1-14 are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
